

BOATER ADVISORY

Dana Point Harbor Maintenance Dredging Project Vessels Should Exercise Caution

The Maintenance Dredging Project is anticipated to begin in late December and continue through April 2016.

An updated schedule will be provided when dates are firm.

Initially the work will involve mobilization of equipment and staging of vessels.

The Dredging Project will allow for the continued operation of the Harbor through the clearing of sediment build-up in navigation channels to improve boating safety and provide much needed beach replenishment.

Boaters should use caution when operating near the dredging equipment during this time.
