

CONSTRUCTION ALERT

Lane Channel Improvement Project

OC Public Works will make improvements to the Lane Channel, which includes regrading and reconstructing the adjacent maintenance road.

WHAT: OC Public Works will make improvements to the Lane Flood Control Channel, located in the City of Irvine, and restore the channel to its original trapezoidal design condition. Adjacent businesses and area commuters will see the use of large equipment, with construction noise anticipated during working hours (listed below). Eroded sections of the channel will be repaired and a "geocell" structure will be installed to line the channel's slope faces and invert. The "geocell" structure will span the length of the project area.

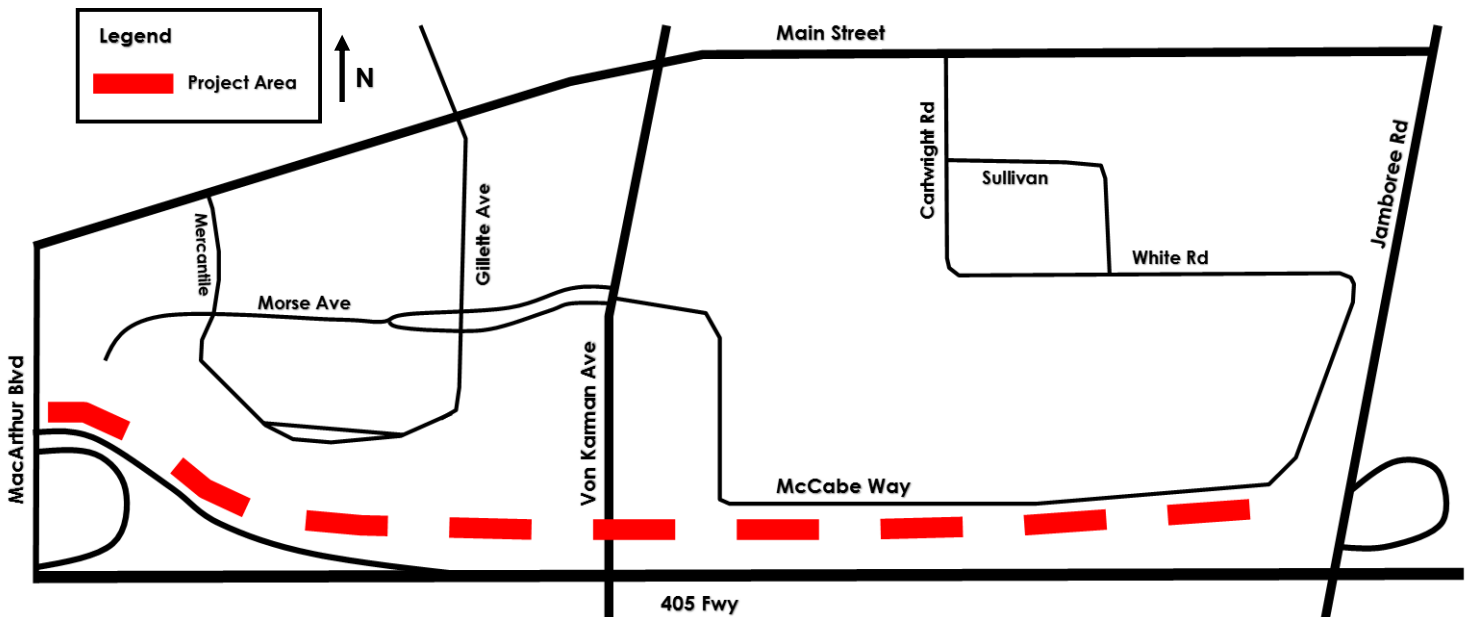

The adjacent maintenance road, which runs parallel to the channel, will be regraded and reconstructed. The regrading will improve the stability of the side slope by diverting runoff water away from the channel's embankment, which will help to eliminate side slope saturation and erosion. A "V" shaped ditch will be integrated into the reconstruction of the maintenance road to increase surface runoff conveyance.

To receive project updates, email ProjectInfo@ocpw.ocgov.com.

WHEN: **Construction Schedule:** August 2018 — May 2019
Working Hours: Monday — Friday, 7 a.m. — 7 p.m.

The construction schedule is tentative and subject to change due to weather or other factors.

WHERE: The project area is located adjacent to McCabe Way and I-405, east of MacArthur Boulevard and west of Jamboree Road. See the project area map below.
