La Pata Water Quality Basins Repair Project

**Project Summary**
OC Public Works will repair two water quality basins adjacent to Avenida La Pata in the City of San Clemente and in an unincorporated County area. Periodic and temporary lane closures during hauling activities may be required. Traffic control measures, such as flag personnel, will be present if lane closures are required.

**WHAT**
The basin repairs include removing area soil and pre-cast concrete slabs, installing hydro turf slope protection, installing pre-cast concrete ring and metal grates, and removing and replacing biofilter media and mulch. OC Public Works will also plant California Bulrush and other native species in the project area.

**WHERE**
The basin repairs include removing area soil and pre-cast concrete slabs, installing hydro turf slope protection, installing pre-cast concrete ring and metal grates, and removing and replacing biofilter media and mulch. OC Public Works will also plant California Bulrush and other native species in the project area.

**WHEN**
Anticipated Construction Duration
November 5, 2019 — March 2020
