Update to County of Orange Advisory Regarding Moderna Vaccine LOT # 041L20A

Santa Ana, Calif. (January 21, 2021) – On Monday, January 18, the California Department of Public Health (CDPH) directed providers to pause dispensing COVID-19 vaccine Moderna Lot # 041L20A due to reported cases of adverse reactions in California.

Late last night, CDPH announced that after further discussions with the Western State Scientific Safety Review Workgroup, Allergy and Immunology specialists, the Food and Drug Administration (FDA), the Centers for Disease Control (CDC), and the manufacturer, CDPH found no scientific basis to continue the pause.

Providers that paused vaccine administration from this particular lot of Moderna vaccine can immediately resume dispensing. The CDC further advised that COVID-19 vaccines are safe and effective. Many people don't have any side effects after COVID-19 vaccines, but some people will have pain or swelling at the injection site or fever, chills, or a headache. These typically don't last long and are signs that your body is building protection.
