

Recorded Real Estate Document Searches FAQ

I cannot find my document number when I search the Grantor/Grantee Index yet it shows on my Credit Report?

- The document number shown on correspondence from the Assessor's Office will be shown in the following format: "R-140072636". The corresponding number in our system will start with the year of recording followed by the last 6-7 digits of each individual document number. The "R-" will be dropped and the first 2 digits of the year will be added in. Therefore R-140072636 will become 20140072636 and R-86000723632 will become 1986000723632.
- Different agencies including the credit agencies can refer to your document # as SQ number, docket #, instrument #, etc. For example, 86000723632 would become 1986000723632 and SQ86000723632 would become 1986000723632. Any letters shown before the number will be dropped off and the missing digits of the year will be inserted.
